Subject: Remediation of the Cinder/Slag Fill Area

398583

007
5e

Dear Joe:

As you are aware and based upon EPA's approval, we are planning to initiate soil remediation activities in the cinder/slag fill area on LPT's 2301 Renaissance Boulevard property tomorrow. As part of these remedial activities, we anticipate that about 5,200 tons of material from the CSFA will be excavated and require off-site disposal. As outlined in Section 7.3 of the Remedial Action/Remedial Design Work Plan developed for this work, this material has been approved for disposal at Waste Management's Pottstown, PA landfill.

This email is intended to request a waiver of the 14/21 day notification requirement for off-site shipments established under Section VI.E of the UAO so that this material can be removed from the site as expeditiously as possible. The following information is being provided per Section VI.E of the UAO:

1. The potentially impacted soil will be shipped to Waste Management's Pottstown, PA landfill;
2. Approximately 5,200 tons of fill material will be shipped to the aforementioned facility;
3. The material will be shipped out to the landfill between 9/14/01 and at least 9/28/01; and
4. The fill material will be shipped to the landfill in DOT approved trucks.

Penn E&R appreciates the EPA's assistance with this matter. Should you have any questions or require additional information, please do not hesitate to call me.

Thanks,
Mike
